

Dear Residential Living Resident,

As you are probably aware, the Food and Drug Administration (FDA) has given Emergency Use Authorization for a COVID-19 vaccine developed by Pfizer and Moderna. With this development, the process of distribution and vaccination is underway.

Due to having a Skilled Nursing Center and Personal Care Communities, Frederick Living (FL) has been placed in the first tier of recipients for the vaccine.

We have recently learned that only residents of Skilled Nursing Center and Personal Care Communities and staff are included in this phase. At this time, it is unknown how and when Residential Living residents such as yourselves will be vaccinated. Will there be a special clinic for you on our campus? Will you be vaccinated at the same time as others in your demographic group from the general community? These are questions that we do not have the answers to at this time.

Our goal is to continue to inform and educate everyone on campus. We plan to use the broadcasts, postings on the website and additional written communications in this effort. In addition, please do not hesitate to contact Emily Messner or Jeremy Kauffman with questions or concerns that you may have.

Wishing everyone a blessed and healthy holiday season.

Sincerely,

John Hendrickson
Chief Executive Officer
